UX/UI Portfolio

Neatsara Somnuek

เณศรา สมนึก · UX/UI Designer

Designing websites, mobile apps, SaaS and enterprise systems for 6+ years, including large government projects

neatsara.b@gmail.com · 099 263 3335 · linkedin.com/in/neatsara

Neatsara / UX/UI Designer

About me

Designing for users and the team that builds

I've worked in design, front-end development and pre-sales, so I bring all three views into my work: the developer who knows what can really be built, the sales side that understands what clients need, and the user who needs it to be easy.

6+
years designing digital products

30+
clients presented to (pre-sales)

15+
systems and products designed

How I work

- Systematic
- Applies new knowledge quickly
- Calm with problems
- Easy to work with
- Decisive

Education

M.Sc. Information Technology Management
KMITL · 2026 – present

B.A. Information Studies (Minor: Business Administration)
Chiang Mai University · Second-Class Honors

English–Japanese Program
Suankularb Wittayalai Rangsit School

Research: presented at the ILI 2019 national conference

Experience

Current

Apr 2024 – Present

UX/UI Designer & Assistant Project Manager

S.W. Tech & Media Co., Ltd.

- Design UX/UI and user workflows for government platforms and enterprise systems
- Produce wireframes, prototypes, system flows and design systems
- Use AI to support design, system analysis and project coordination

Dec 2022 – Apr 2024

UX/UI Designer

Netka System Co., Ltd.

- Designed UX/UI and prototypes for enterprise software
- Built and maintained a design system for consistent UI
- Improved information architecture to make products easier to use

Jun 2019 – Jun 2022

UX/UI Designer & Front-end Developer

TechCons Biz Co., Ltd.

Multiple roles: UX/UI Design · Graphic Design · Front-end · Marketing · Pre-sales

- Designed UI for websites and web apps, from wireframes to final screens
- Built responsive websites and apps with React and WordPress
- Created graphics, social media and marketing materials
- Managed website content and supported online marketing, including SEO
- Supported pre-sales with solution presentations and system demos

UI design

- UI design
- Design systems
- Prototyping
- Responsive design
- Light/Dark theming
- Wireframing
- User flows
- Figma
- Adobe XD
- Sketch
- Photoshop
- Illustrator

Business & system analysis

- Requirement analysis
- Workflow analysis
- User & system analysis
- Business understanding

Technical

- HTML
- CSS
- Vue
- React
- WordPress
- SQL
- PHP

AI & dev tools

- Claude
- Cursor
- VS Code
- Git

Project management

- Stakeholder collaboration
- Cross-functional teams
- Presentation
- Pre-sales
- Jira
- ClickUp
- Miro

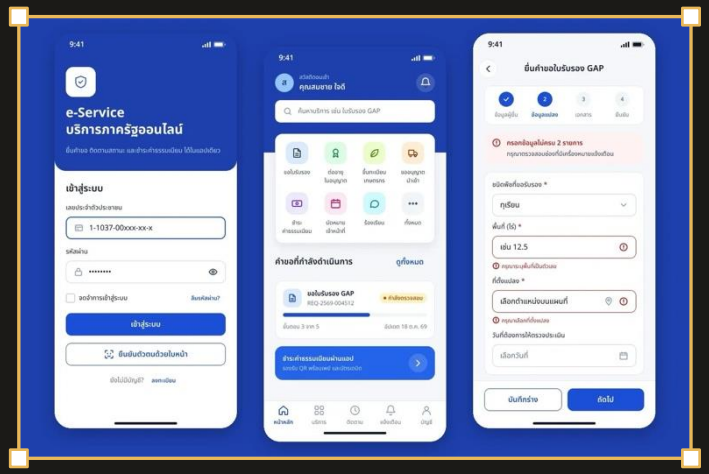

Case studies

The story behind each screen: who the users are, where they get stuck, and how design helps

MeePay

e-Service · AI

Case study 1

MeePay: pay anywhere, borderless

A finance app that brings every bank account and currency into one place. Exchange instantly at transparent rates, scan or tap to pay abroad, and always see real spending in Thai baht.

Role	**UX/UI Designer (end to end)**
Platform	**iOS mobile app**
Scope	**Research → UI → Prototype**

Problem

Money spread across apps, hidden fees, rates you have to work out yourself

Solution

One app for every account and currency, with Auto Travel Mode

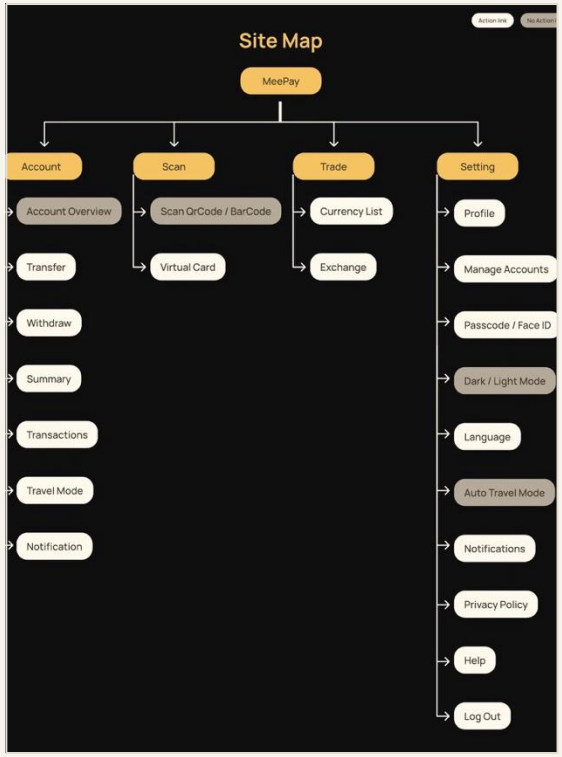

From personas to app structure

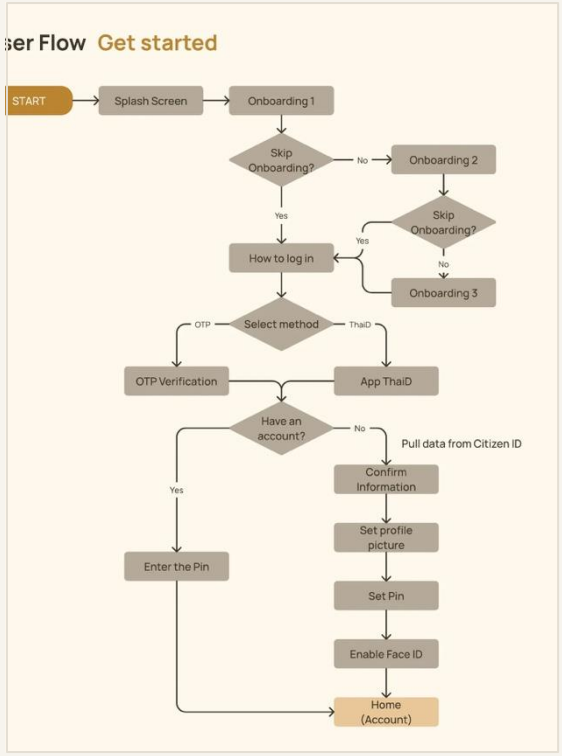

Persona: Ploy, a student who sells pre-order goods

Persona: Bank, a project manager who travels often

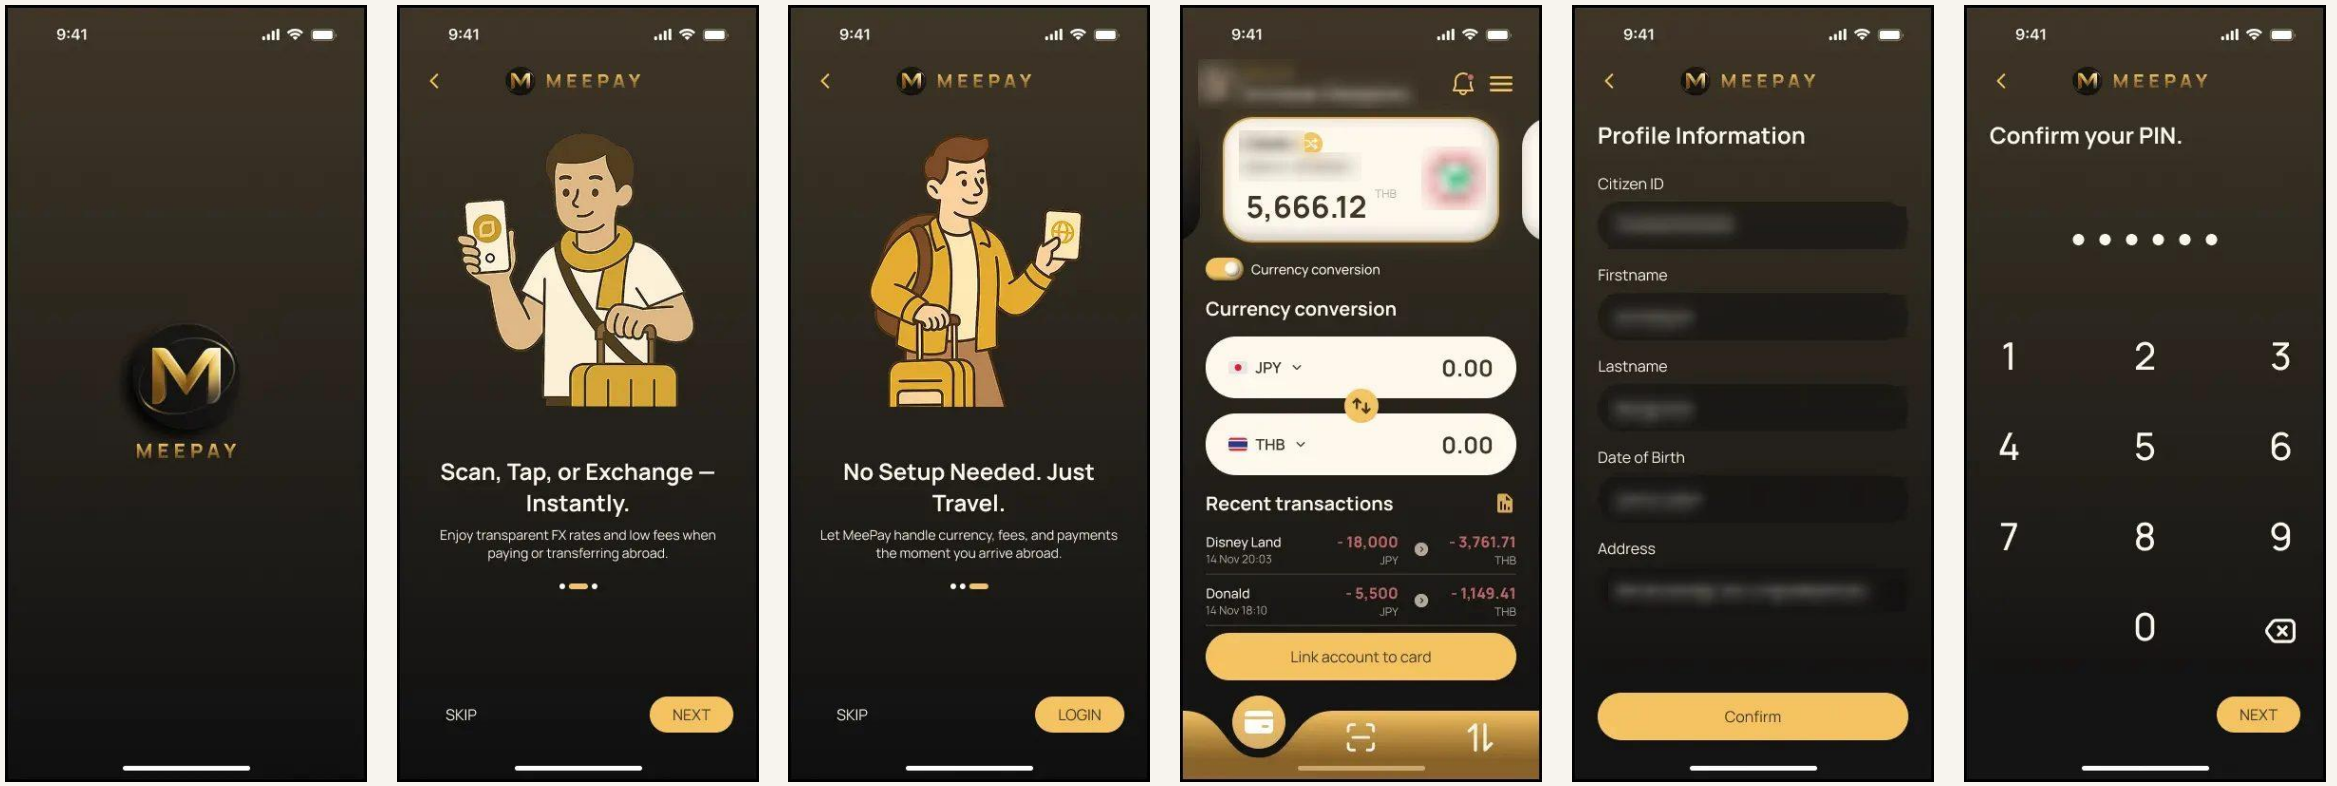

Site map with 4 tabs: Account, Scan, Trade, Setting

User flow: getting started (OTP / ThaiD, PIN, Face ID)

Black and gold, light and dark from one token set

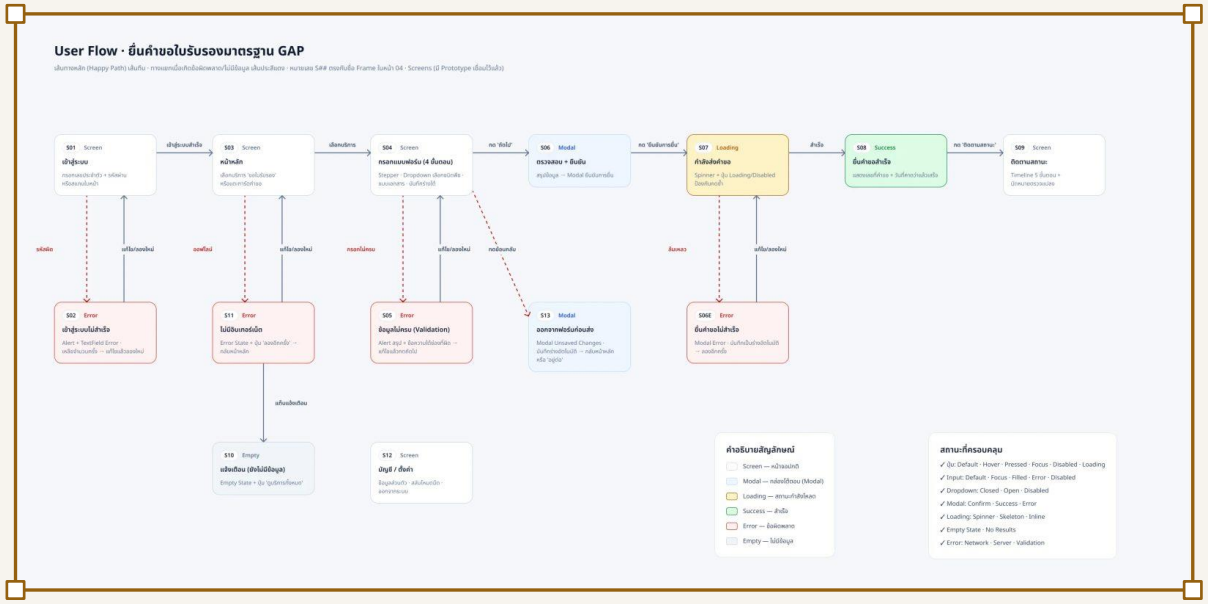

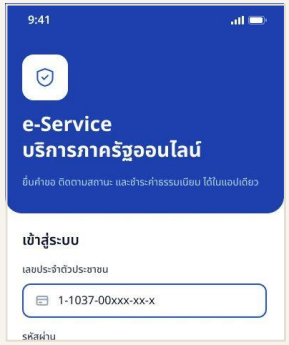

Colours and variables are set up as Figma variables in light and dark, so every screen switches mode instantly

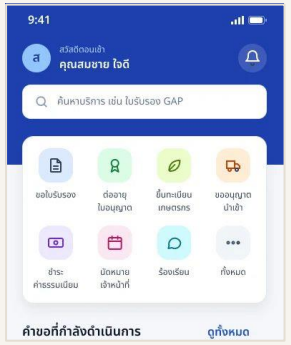

Case study 2

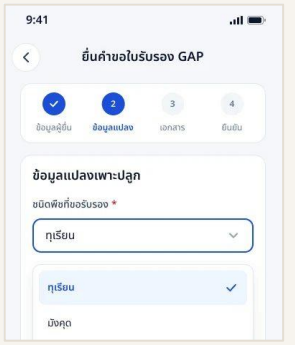

An e-Service designed with AI

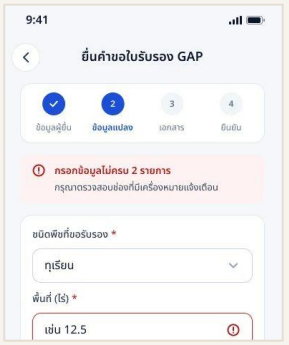

An online service for farmers to apply for GAP certificates, pay fees and track status on mobile, plus a web portal and back office, built as a full design system

1 Structure first
Define user flows, the screen list and naming rules

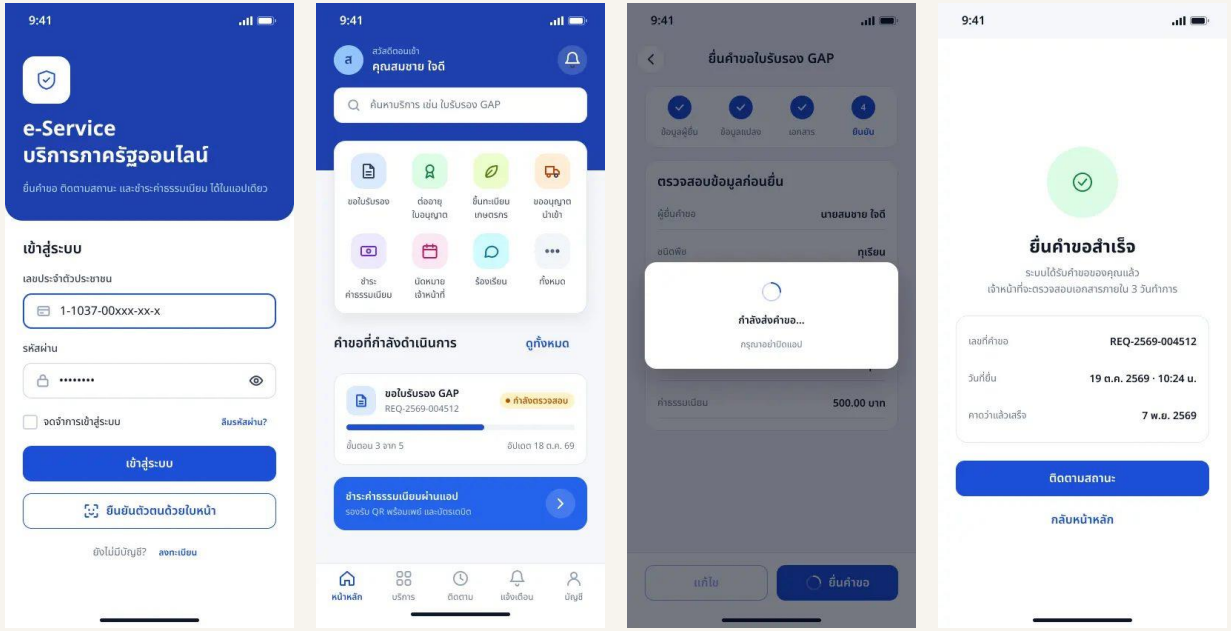

2 Tokens and states
AI drafts light/dark tokens and component states

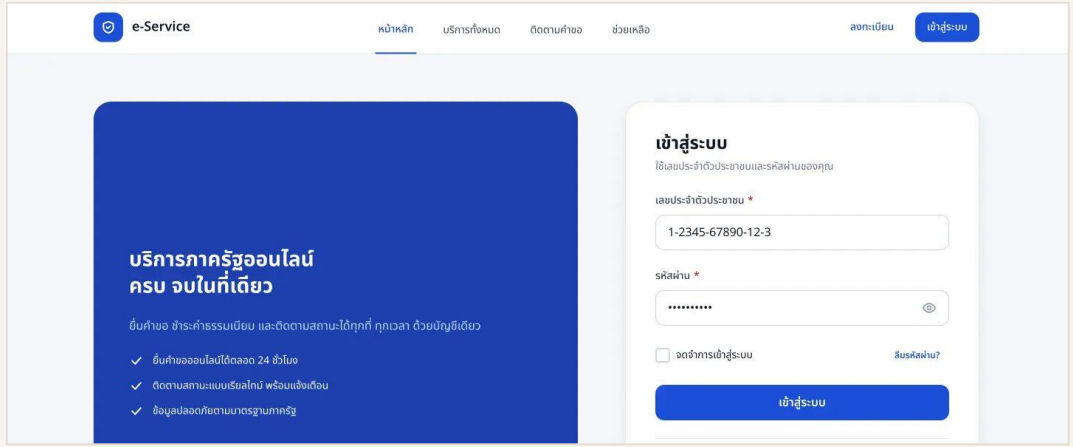

3 Accessibility check
Contrast measured to WCAG 2.1 AA in both modes

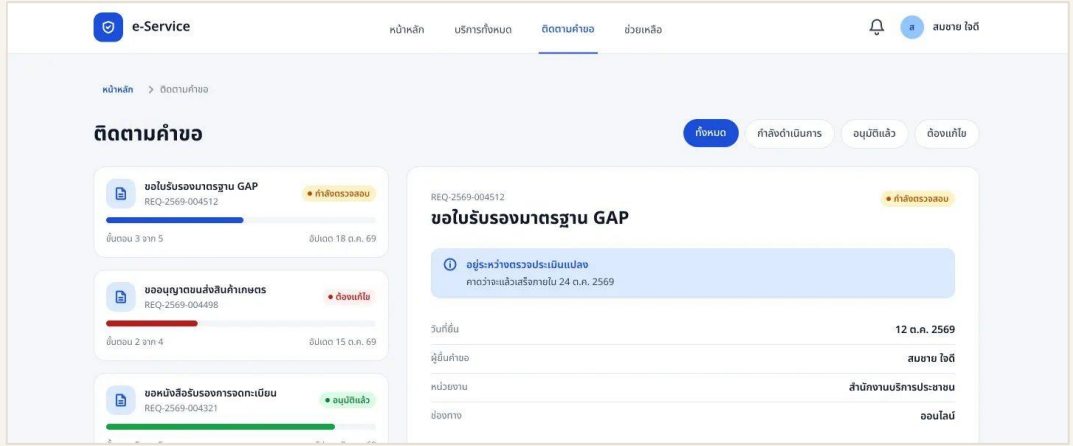

4 Review and refine
Every screen checked against the flow and tested at 360–430 px

e-Service · Mobile & Web

13 mobile and 9 desktop screens, light and dark

Citizen portal: sign in, apply, track status · Back office: dashboard, request queue, and a review page with a confirm step before decisions

Featured work

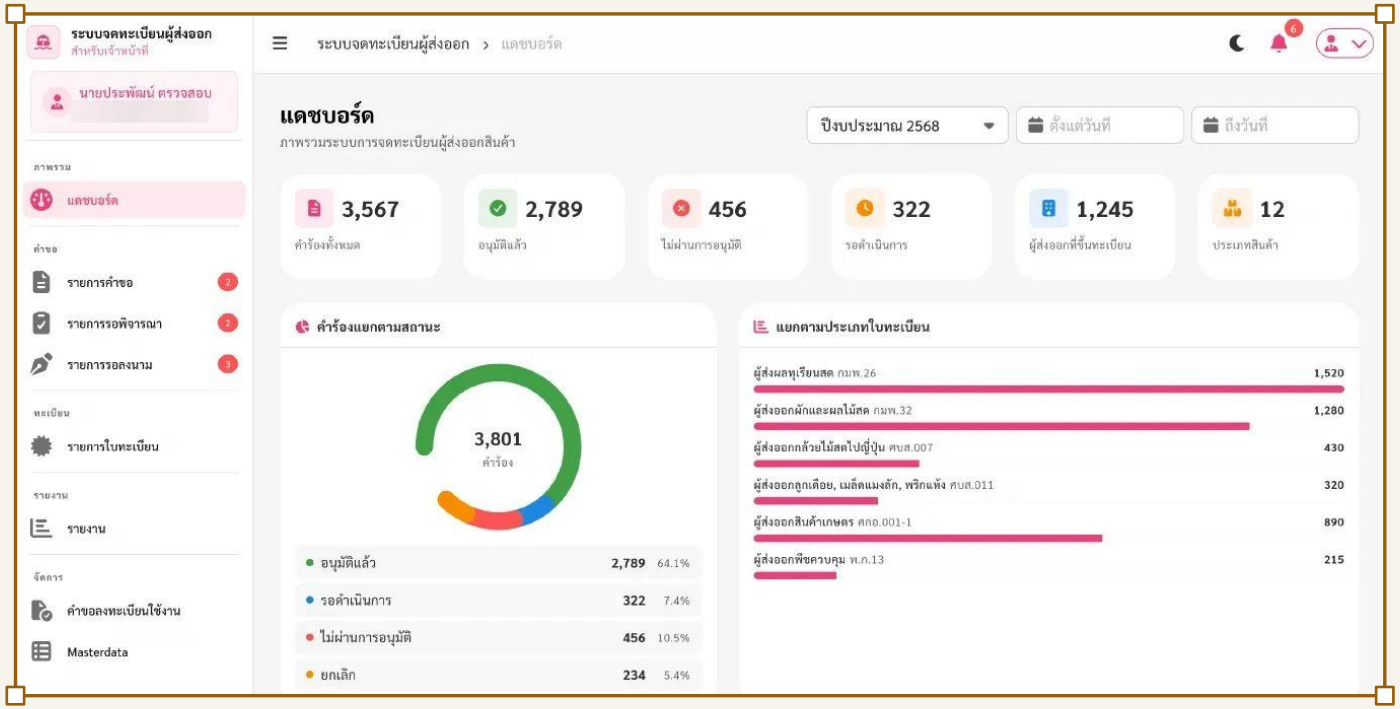

Systems designed and delivered for government agencies

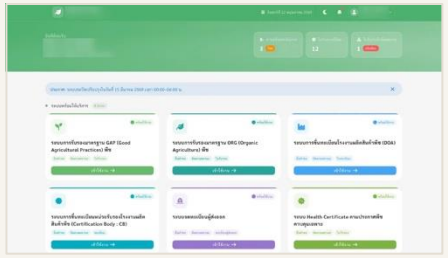

Delivered

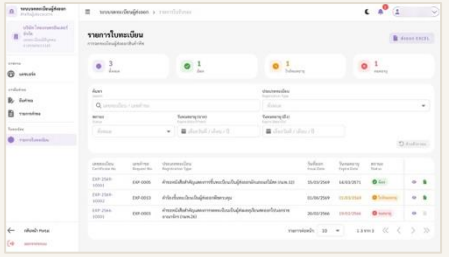

Agricultural agency e-Service platform

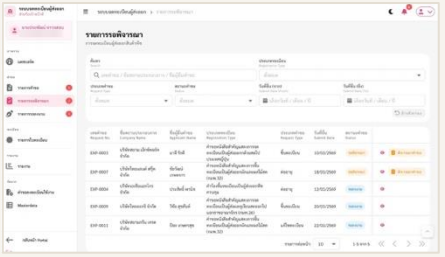

An online service portal and exporter registration for both applicants and officers, built with AI vibe coding and Figma

- Sign in once, then choose your role and the account you act for
- The portal shows every service as a card with its status
- Applicant and officer workspaces use different primary colours
- Long forms split into a stepper that reuses existing data

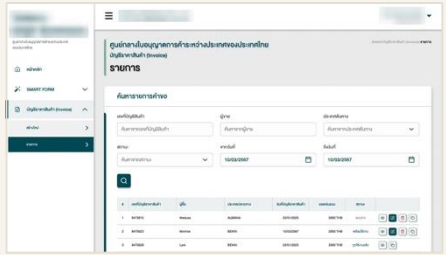

Delivered

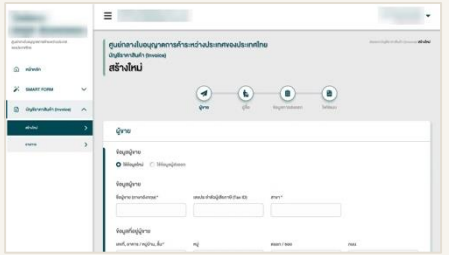

National trade single submission

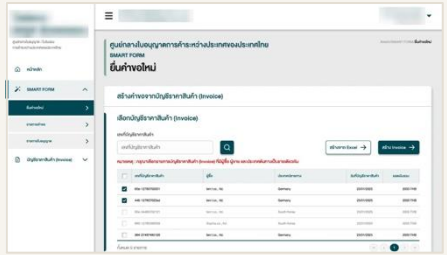

A smart form that lets importers and exporters create an invoice once, then reuse it for every licence and certificate request

- Start from the trade type: import, export, transit
- Create the invoice first, then submit requests
- Import many invoices at once from Excel
- The stepper pulls invoices and items into the request, so data is entered once

Delivered work

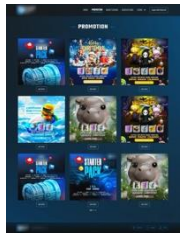

Game community website

Delivered

UI design · Wireframe

Game community website: landing page, promotions, news, store, cart, points and redeem, from wireframe to UI.

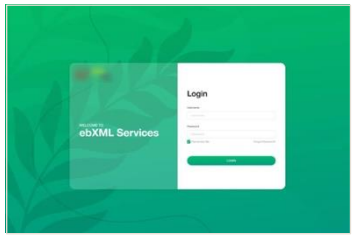

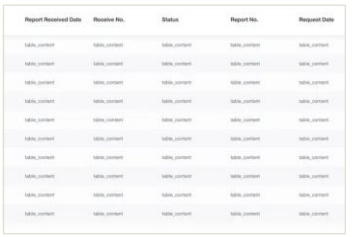

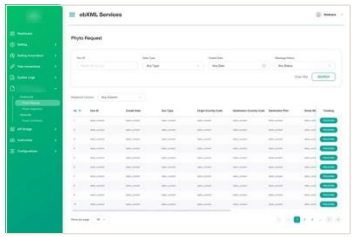

ebXML message services

Delivered

UI design

Phyto request and inspection messages, tracking and permissions.

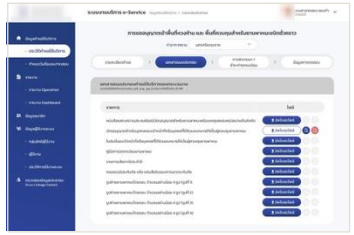

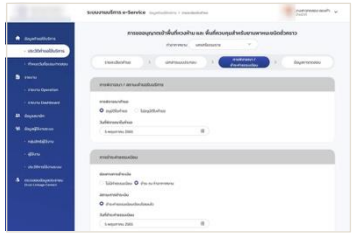

Airport agency e-Service

Delivered

UI design

Multi-step permit request on web, plus a mobile app for leave requests and approvals.

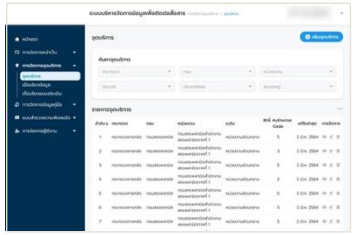

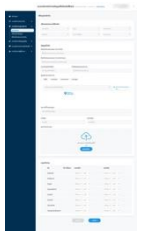

Government service directory

Delivered

UI design

Service search with map, service details and channels, and service-point management.

Delivered · 2/3

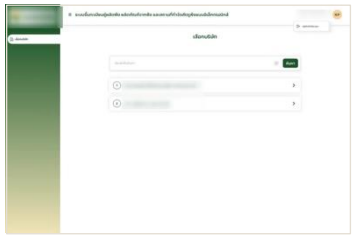

Delivered work

Exporter registration system

Delivered

UI design

Company selection, new requests such as methyl bromide fumigation, and inspection results.

e-Payment

Delivered

UI design

Overview dashboard, payment items and adding projects for fee collection.

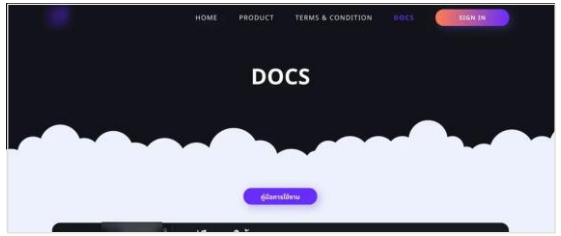

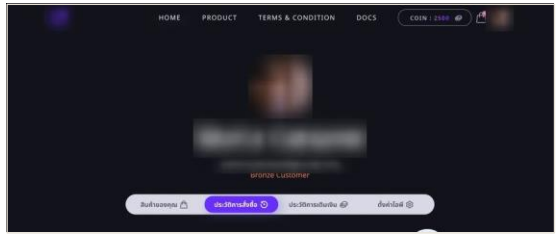

Game script store

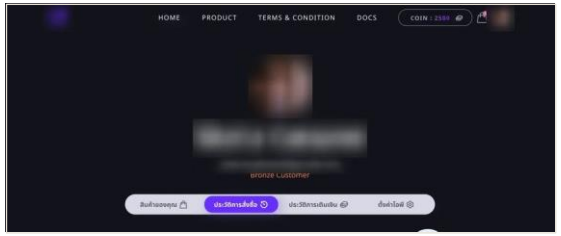

Delivered

UI design

Game script store: home, products, cart, top-up, order history and docs, on desktop and mobile.

Delivered · 3/3

Delivered work

Association website

Delivered

UI design

Responsive website and member directory on mobile.

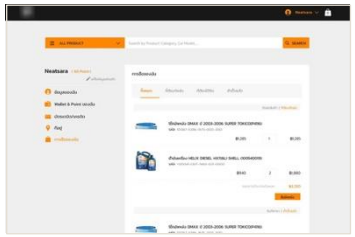

Auto parts e-commerce

Delivered

UI design

Auto parts e-commerce: search by car model and order history.

Meow Wat: online cat game

Personal

AI · UI design · meow-wat.com

Online cat-themed RPG built with AI vibe coding: town square, dungeons, pets, inventory, season pass and chat with cat stickers.

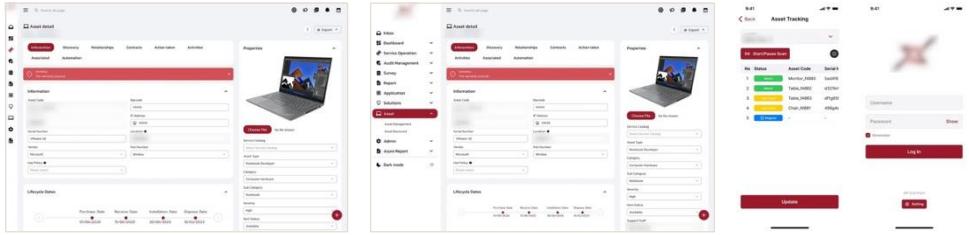

Company products

Enterprise service desk

Product

UI design · Redesign · Design system

Asset tracking mobile app, redesigned incident and asset pages in light and dark, and the design system.

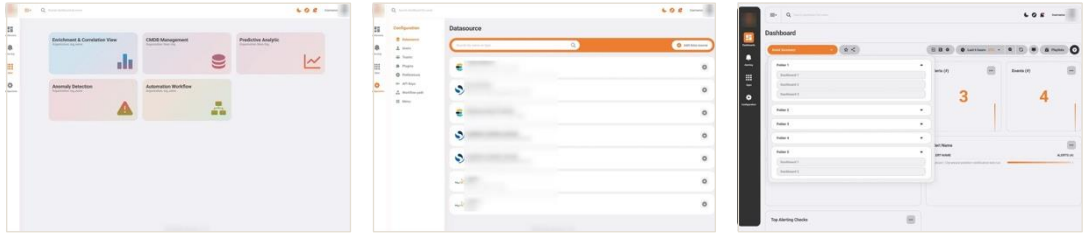

AIOps monitoring platform

Product

Redesign · Design system

Redesigned app launcher, dashboards, playlists, data sources and alerting, in light and dark.

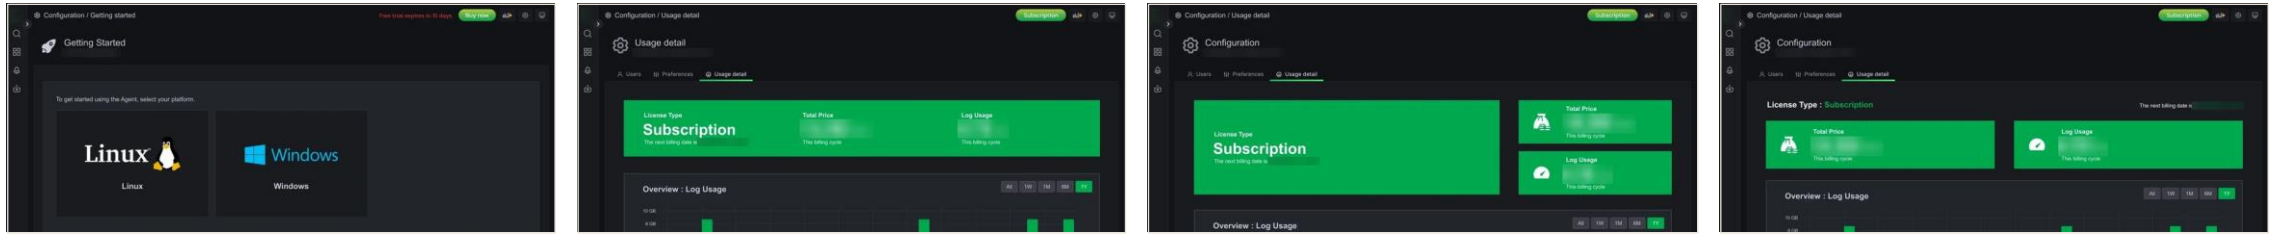

Log management SaaS

Product

UI design · Redesign · Design system

SaaS getting-started flow, usage and subscription, password reset and a redesigned dashboard.

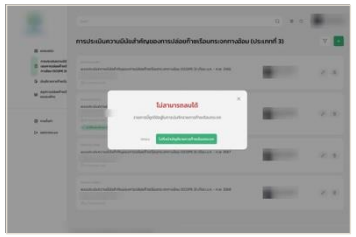

Company products

Carbon footprint platform

Product

UI design · Design system

Carbon footprint platform: GHG records, evaluations, reports, goals and settings, with its design system.

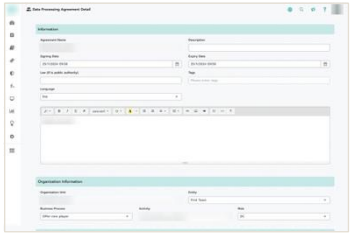

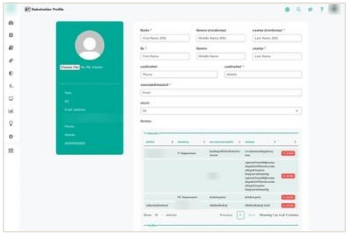

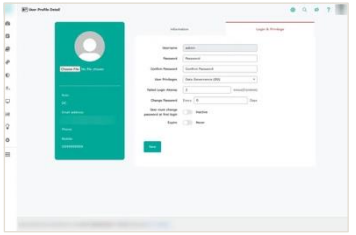

Data privacy (PDPA) platform

Product

Redesign

PDPA tools: data processing agreements, stakeholder profiles and cookie banner settings.

Network policy manager

Product

Wireframe

Wireframes for policy list, new policy, criteria, set-up and results.

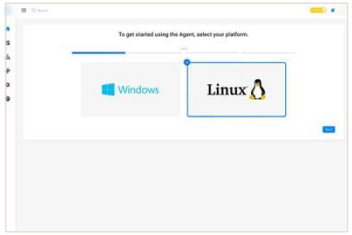

Company products

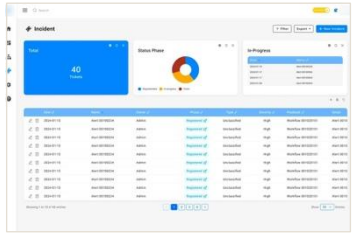

Incident management

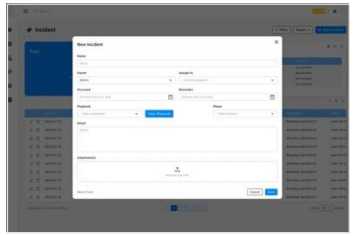

Product

UI design

Agent setup by platform, incident dashboard and new incident form.

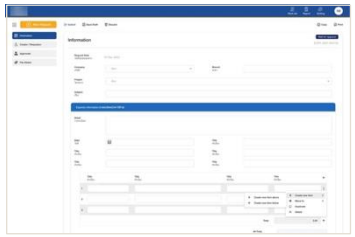

Document approval workflow

Product

UI design

Worklist with document preview, request form and mobile calendar.

Produce traceability website

Product

UI design

Traceability lookup, product catalogue and harvest summary.

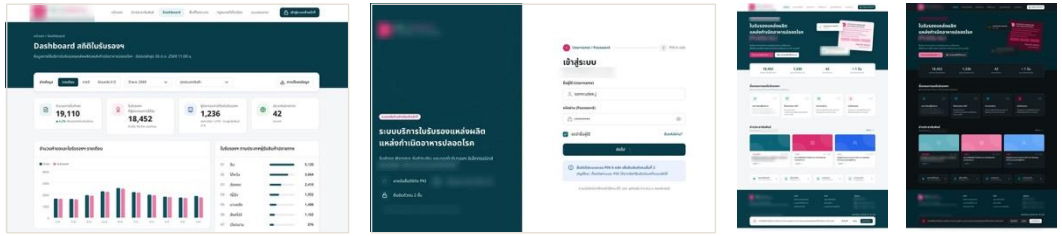

Bid work

Food production site certification

Bid

AI · UI design

Certificates for food production sites: public portal, outbreak checks, dashboards, and an officer back office, designed with AI in light and dark.

Readiness Status System

Bid

AI · UI design

Bid prototype built with AI vibe coding: readiness dashboard, charts, map and status lists.

Energy agency e-Service portal

Bid

AI · UI design

Bid prototype built with AI vibe coding: sign-in, service requests and dashboards.

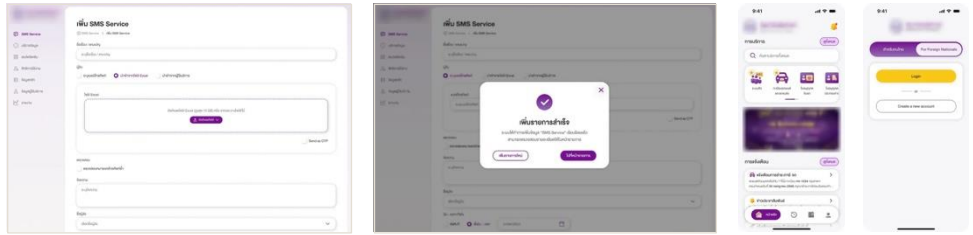

Vehicle services super app

Bid

UI design

Mobile app for transactions, queues, vehicles and notifications, plus an SMS and media back office.

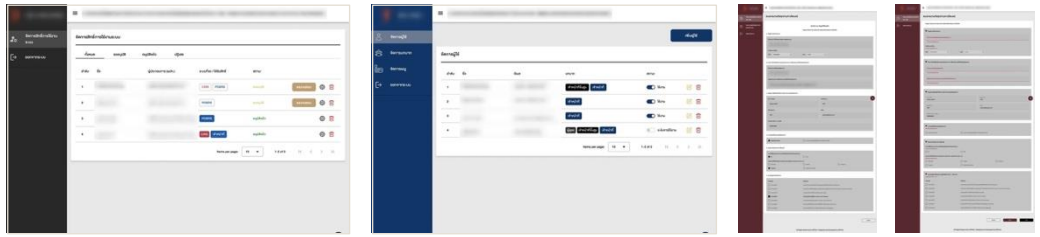

Bid work

Regulatory report system

Bid

UI design

Portal, report submission and review for users, staff and admins.

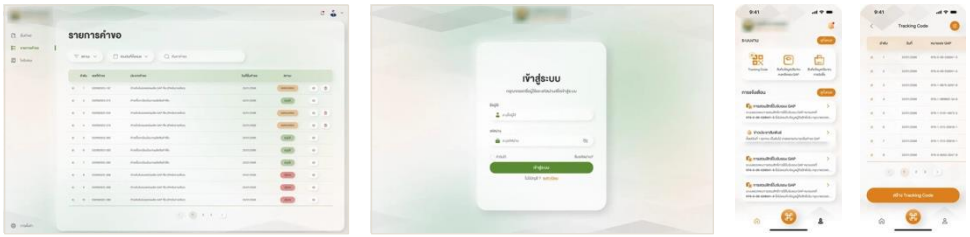

GAP request system

Bid

UI design

Operator and staff workspaces for GAP requests, plus a mobile tracking-code app.

Single sign-on for agency services

Bid

UI design

One sign-in for entrepreneurs and officers, registration steps and service menu.

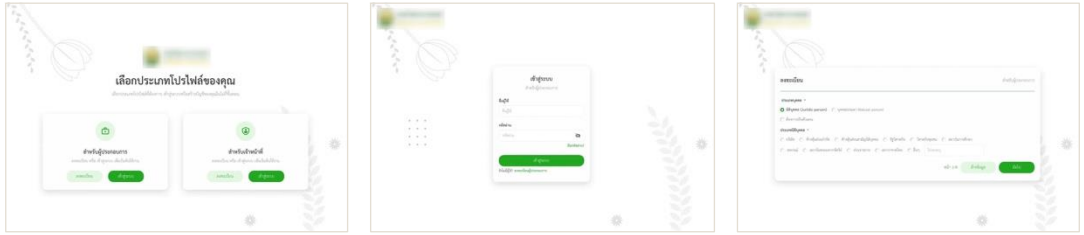

Bid work

Agency e-Register

Bid

UI design

Choose user type, sign in and register as a juristic person.

Bank data linkage

Bid

UI design

Data and reports, status checks and person checks.

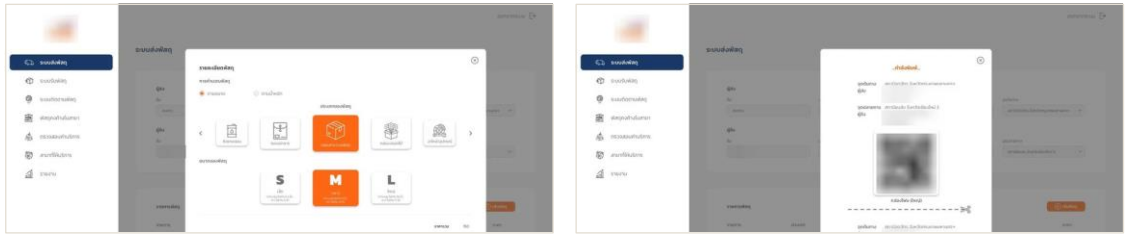

Parcel delivery system

Bid

UI design

Choose parcel type and size, then print labels with QR codes.

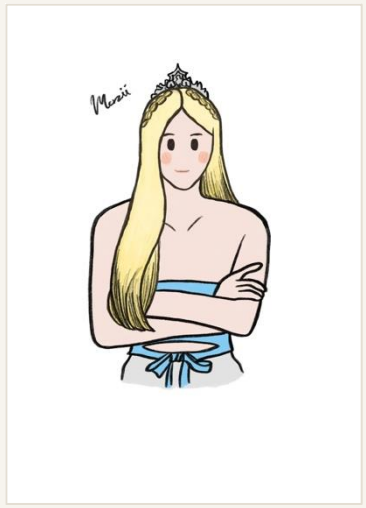

Creative work

Graphics, drawings and LINE stickers

Graphics and drawings: posters, social media and characters

Meaw(Mun)Keaw

Meaw(Car)Rot

WOLF

LINE stickers designed and sold on the LINE Store

Certificates and continuous learning
